

LYVN Digital Pressure Canner — 12 Quart (12 L)

Smart electric canner with guided processing for both low-acid and high-acid foods. The intuitive digital display walks you through every step - venting, processing, and cool down - for safe, reliable results every time.

Key Benefits

- Two canning modes - pressure canning (low-acid) and hot water canning (high-acid).
- Digital guidance with on screen prompts for each stage.
- Built-in sensor maintains precise processing temperature for safe pressure canning. No adjustments and calculations needed for pressure canning at high altitudes.
- Jar pre heat and hold function keeps jars ready until processing begins when using as hot water canner.
- Comprehensive safety system with locking lid and alerts.

Specifications (AU)

- Capacity: 12 L (12 qt).
- Typical jar load: up to 10 × half-pints, 8 × pints or 5 × quarts (depends on jar style).
- Power: 220-240 V ~ 50 Hz appliance.
- Modes: pressure canning and hot water canning.

What's in the Box

- Digital pressure canner with control panel.
- Removable canning rack.
- Digital user guide.

Care & Safety

- Always use tested recipes from reputable sources.
- Run the initial water test before first use.
- Wipe clean only - do not immerse the base. Store dry with the lid unlocked.

Optional Add-ons

- Second rack (if suitable for your jar sizes).
- Spare sealing ring and safety plug (model-specific).

Australian support & warranty: LYVN is Australian owned. Local parts, service and ACL-compliant warranty available.

LYVN Digital Pressure Canner — 23 Quart (22 L)

Extra tall electric canner designed to handle quart jars and large batches with ease. Smart sensor control and guided digital display take the guesswork out of safe home canning.

Key Benefits

- Designed for quart jar capacity and mixed jar loads.
- Two processing modes - pressure (low-acid foods) and hot water (high-acid foods) canning.

- Intelligent sensor maintains target temperature & display prompts guide each stage.
- Jar pre heat and hold function for smoother workflow when used as a hot water bath canner.
- Comprehensive safety system with locking lid and alerts.

Specifications (AU)

- Capacity: 22 L (23 qt).
- Indicative load: up to 26 × half-pints*, 20 × pints* or 7 × quarts (*double-decking where applicable).
- Power: 220-240 V ~ 50 Hz appliance.
- Modes: pressure canning and hot water canning.

What's in the Box

- Extra-tall digital canner with control panel.
- Canning rack.
- Digital instruction and recipe guide.

Care & Safety

- Use tested recipes and follow instructions precisely.
- Complete the initial water test before first use.
- Wipe clean only; do not immerse base. Store with lid unlocked.

Optional Add-ons

- Second rack for double stacking (if compatible).
- Spare seal and safety plug (model-specific).

Australian support & warranty: LYVN is Australian owned. Local parts, service and ACL-compliant warranty available.
